WORK EXPERIENCE

SEPTEMBER 2023 - CURRENT

PHP Developer & MERN STACK DEVELOPER

Cloudb software solution pvt ltd | Virudhunagar, Tamilnadu

• HEALTH FUND SYSTEM

I developed a system using **ASP.NET, Telerik, SQL Server**, and **AWS** to manage personal records, dependent information, job history, comments, address history, and job classes. The system includes features like document uploads, company details, agreements, schedules, and processing screens. AWS for cloud infrastructure and SQL Server for database management.

• CREATIVE DESIGN PACK

An eCommerce website developed using **React, Redux**, and **Serverless AWS services** like **S3 Bucket, DynamoDB, Cognito, Secrets Manager**, and **CloudFront**. The admin allows create users, products, categories, and custom pricing for users. The user side includes login, shopping cart, product browsing, user profile, previous orders, and the ability to reorder.

• BCC ERP Project

I developed a system using **React, Node.js, MongoDB, and Redux**, which includes features such as web login/registration, master pages for city, designation, state, and degree, and client creation for schools with employee mapping across multiple clients. Key modules include a monthly calendar, leave requests, permissions, to-do tasks, payroll, payslips, master and monthly trackers, and employee management

• Magoprinpro & Vindini vysage

I developed a system using **React, Redux, MongoDB**, and **Node.js**, featuring web login, master pages for various data segments, and a transaction management system for vendor creation, order placements, payments, and invoices. The platform also manages employee reports, check-ins, expense entries, and account year management. Key reports, including attendance, vendor, and payment reports, can be exported in PDF or CSV formats, and Firebase is integrated for web push notifications on new orders, payments, or expense entries.

• BEEBOOK (Accounting Software)

Billing software using **PHP, MySQL**, and the **MVC framework**. My role involves maintaining the system, implementing updates, adding new features, and fixing bugs based on client requests to ensure smooth and efficient operation

FEBRUARY 2023 - AUGUST 2023

PHP Developer & Hardware maintenance

VVV & Sons edible oils ltd (IDHAYAM Oil) | Virudhunagar, Tamilnadu

- Worked on the **EARMS ERP Software**, developed using **PHP, MySQL**, and the **MVC framework**, providing updates and improvements on admin side.
- Managed hardware tasks, including server maintenance and CCTV systems, ensuring smooth and efficient operations.
