- Ajax

## Education:

Bachelor's Degree in Science (PCM)

University Name: University College of Science Tumkur

Location: Tumkur

Graduation Year: 2018

## Projects:

- Developed an e-commerce website using Laravel, allowing customers to browse and purchase products securely. Implemented features like user registration, product search, shopping cart, and payment integration.
- Created a matrimony platform using Laravel, enabling users to create profiles, search for potential partners, and communicate securely. Implemented advanced search filters, matching algorithms, and privacy settings.
- Built a tours and travels website similar to MakeMyTrip using Laravel, providing users with the ability to search and book flights, hotels, and holiday packages. Implemented dynamic pricing, booking management, and integrated third-party APIs.
- Developed an informative dynamic website using Laravel, allowing users to browse and search for articles, news, and resources. Implemented a content management system (CMS) for easy content updates.
- Created a temple poojas project using Laravel, where each pooja has different packages based on package prices. Implemented features such as package selection, payment integration, and booking management.
